### Signage solutions for governmental entities

**LyncVerse Technologies** is an information technology provider of hardware, software, and professional services focused on empowering organizations to capitalize on the latest technologies to solve their business challenges.

Their service includes designing next generation A/V Solutions for boardrooms, auditoriums, conference rooms, and hybrid classrooms.

“Our dedication to innovative design and effective communication ensures that every piece of signage reflects the individuality and narrative of our valued clients, creating lasting impressions and meaningful connections,” stated Sherrard Thomas, president and CEO.

“We have seen how the power of storytelling via digital signage has impacted the culture of a school, but most importantly, its impact on student achievement.”

**Lyncverse Technologies** has served dozens of CP members, providing support with their Signage ONE software. Signage ONE is an all-inclusive digital signage service that includes award-winning content creation, custom designed layouts, professional deployment, scheduling, management, and ongoing support.

If security is your priority, Signage ONE is compliant with the Common Alerting Protocol (CAP), meaning it integrates with your current mass notification systems to help protect your campus or workplace once an event is triggered by displaying messages anywhere there is a TV, both indoors and outdoors.

“The team at Choice Partners has been fantastic to work with and they really have the best interest of their members at heart,” Thomas stated.

“Anytime we have a question, they are quick to answer and will go the extra mile to support small businesses. Our contract broadens our ability to find new business and minimizes the time from quote to purchase order.”
