

COVID CLEANUP

PANEL DISCUSSION WITH CP AND BUCKEYE INTERNATIONAL

Buckeye®

Webinar FYI

- Webinar topic discussion is set to conclude at 11 a.m. followed by a Q&A session.
- Submit a questions.
- Webinar is being recorded (and will be posted at www.choicepartners.org)
- All attendees will be in listen-only mode.
- CP staff members are on standby if you need help.
- CEU credit is being offered through this webinar.

Introduction

- ❑ **Welcome** (*Jeff Drury, Director of Choice Partners*)
 - Choice Partners / HCDE Background

- ❑ **Agenda**
 - Introduction
 - Topics
 - Best Practices & Safety Measures
 - Hand Hygiene
 - Reopening Support Tools
 - Moderator (HCDE/CP) and Panelists (Buckeye International)

Moderator

Stephen Kendrick
Senior Manager, Facilities Planning
Harris County Department of Education

Stephen's wide-reaching expertise in facilities stems from more than 15 years of experience in construction, job order contracting (JOC), and procurement in the government, education and private markets. He conducts training for school districts and other governmental entities.

Panelist

Scott Criswell, President Symmetry Hand Hygiene

Scott has 25 years of sales and management experience at Buckeye International working with healthcare, education, retail and community markets implementing facility maintenance programs. Since 2008, as President of Symmetry, his main area of expertise has been implementing hand hygiene programs across those same markets.

Panelist

Scott Maag, Director of Research

With a dual major in Chemistry and Biology, Scott has 28 years of product research, formulation, and management experience in the cleaning and maintenance products industry. He is currently Vice President of Operations, Director of Research and Development at Buckeye International, Inc.

Panelist

Troy Payment Midwest Sales Director

A former Captain in the U.S. Army, Troy has 17 years of cleaning and maintenance industry experience with Buckeye International as a manufacturing sales representative, Field Sales Manager, Director of Buckeye Cleaning Centers, and currently Midwest Sales Director.

The Buckeye logo is displayed in a blue, downward-pointing chevron shape. The word "Buckeye" is written in a bright green, cursive-style font, with a registered trademark symbol (®) to the upper right of the "e".

Best Practices & Safety Measures

Novel Coronavirus (COVID-19)—Fighting Productsⁱ

UPDATED 6/19/2020

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the current novel coronavirus (COVID-19) outbreak. **This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use during the COVID-19 situation.** In particular, this list does not include products that appear solely on EPA's List G and L, although the EPA has now included these products to List N. For additional reference, please see <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

The information in this document is being provided as a public service. All efforts have been made to ensure the information is accurate, but ACC and CBC make no representations or warranties as to the completeness or accuracy of the information. ACC, CBC, and the product manufacturers listed in this document reserve the right to change, delete, or otherwise modify the information without any prior notice. Persons receiving this information must make their own determination as to a product's suitability prior to use based on the product labeling. ACC and CBC do not guarantee or warrant the standard of any product referenced or imply approval of the product to the exclusion of others that may be available. All products listed are registered for labeled uses in accordance with federal laws and regulations as of the date this document is being made available. State regulations may vary. In no event will ACC or CBC be responsible for damages of any nature whatsoever resulting from the use of or reliance upon products to which the information refers.

For more information about the COVID-19 Product list, please check out the following [COVID-19 FAQ](#) and the [Center for Biocide Chemistries FAQ](#). Additional information about how good chemistry is helping in the fight against COVID-19 can also be found at [Good Chemistry Lives Here](#).

Note: The CBC cannot make a determination of the effectiveness of a product in fighting pathogens like COVID-19. For questions related to the effectiveness of any product not listed below, please contact the manufacturer directly.

For use of the product, please contact the company/distributor to confirm use directions, or consult the EPA approved label at <https://www.epa.gov/pesticide-labels/pesticide-product-label-system-ppls-more-information>.

Tier I Products - Products that are in compliance with EPA's *Emerging Viral Pathogen Guidance for Antimicrobial Pesticides*

Enhanced Procedures to Protect Your School

The seriousness of the 2019 Novel Coronavirus (SARS-CoV-2) and resulting illness (COVID-19) has caused a state of heightened awareness surrounding respiratory illness. Here's what you can do to help protect your school against the spread of germs while students are away.

Proactively and continuously fight microbes 24/7 on your floors.

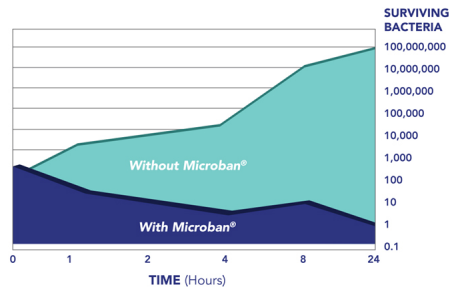

Clarion® 25 with Microban® technology is the world's first antimicrobial floor finish that provides an added level of proactive protection against damaging microbes such as bacteria.

Microban technology is built-in to Clarion 25 during the manufacturing process. When microbes come in contact with the product surface, Microban technology penetrates the cell wall of the microorganism and disrupts the cell, making the microorganism unable to grow and reproduce.

Achieve Microban protection efficiently with a top scrub and recoat.

Top scrub and recoat your floors using Clarion 25 with Microban technology. Top scrubbing removes the top layers of floor finish where scratches develop and dirt becomes embedded over time. Once the top layers of floor finish are removed, they are replaced with new coats of floor finish. Top scrubbing is an important step to making your floor finish last up to 3 years.

- 1 Scrub the floor with a Buckeye Floor Cleaner (suggested are Buckeye Eco® products: E11, E15 or E32) with a Blue Scrubbing Pad (#400170) or a Green Scrubbing Pad (#400195). Rinse floor with water as necessary.
- 2 High-speed burnish with a Light Blue Burnishing pad (#400210) or low-speed buff with a Red 40 Light-Duty Pad (#404293) to smooth out roughened finished surface for maximum floor finish adhesion and gloss.
- 3 Dust mop the floor with untreated dust mop.
- 4 Apply **2 coats** of Clarion 25 Microban Antimicrobial Floor Finish.
- 5 Allow at least **48 hours** before burnishing or buffing the floor.

Protect your facility by deep cleaning and using an EPA Recognized Emerging Pathogen Disinfectant.

The Centers for Disease Control and Prevention (CDC) recommends cleaning and disinfecting frequently touched objects and surfaces following product label directions and proper dwell times. Buckeye's Eco® Proportioning Program is fully integrated with effective, hermetically sealed products, including EPA emerging pathogen disinfectants, for any application.

Disinfect Spray high-touch areas with a Buckeye Disinfectant.
Do not wipe down.

High Dust Clean in a clockwise pattern around the room everything above the shoulders.

Spot Clean Clean glass, acrylic glass and white dry-erase boards with a Buckeye Glass Cleaner. Spray tough soils with a Buckeye Muscle Cleaner. Let it dwell 2-3 minutes. For stubborn stains, agitate the area and then wipe it clean with a paper towel. Go back to those high-touch areas initially sprayed with a Buckeye Disinfectant (after 6-7-minute dwell time), spray areas again and wipe down (the last 2-3-minute dwell time will be achieved for complete disinfection).

Dust Mop or Sweep Scrape up items stuck to the floor with a putty knife, being careful not to gouge the floor.

Damp Mop Scrape up items stuck to the floor with a putty knife, being careful not to gouge the floor.

Empty Trash Do not push down on trash as there may be sharp objects in the trash bag.

EPA Pre-Approved Products

The American Chemistry Council has compiled a list of products that have been **pre-approved** by the US Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the COVID-19 outbreak, including these Buckeye products.*

- #5090-5000 Buckeye Sanicare Quat-256™
- #5087-5000 Buckeye Sanicare Quat-128™
- #5076-5000 Buckeye Sanicare Lemon Quat™
- #5077-5000 Buckeye Sanicare Mint Quat™
- #5078-5000 Buckeye Sanicare Pine Quat™
- #6023-1400 Buckeye Eco® Neutral Disinfectant E23/S23
- #6022-1400 Buckeye Eco® One-Step Disinfectant-Deodorizer-Cleaner E22, S22
- #5680-5000 Buckeye Sani-Q2™
- #5099-5000 Buckeye Sanicare TBX™
- #5099-5000 Buckeye Terminator™

Hand Hygiene

Coronavirus Disease 2019 (COVID-19)

[CDC](#) > [Coronavirus Disease 2019 \(COVID-19\)](#) > [Prevent Getting Sick](#)

Everyone Should

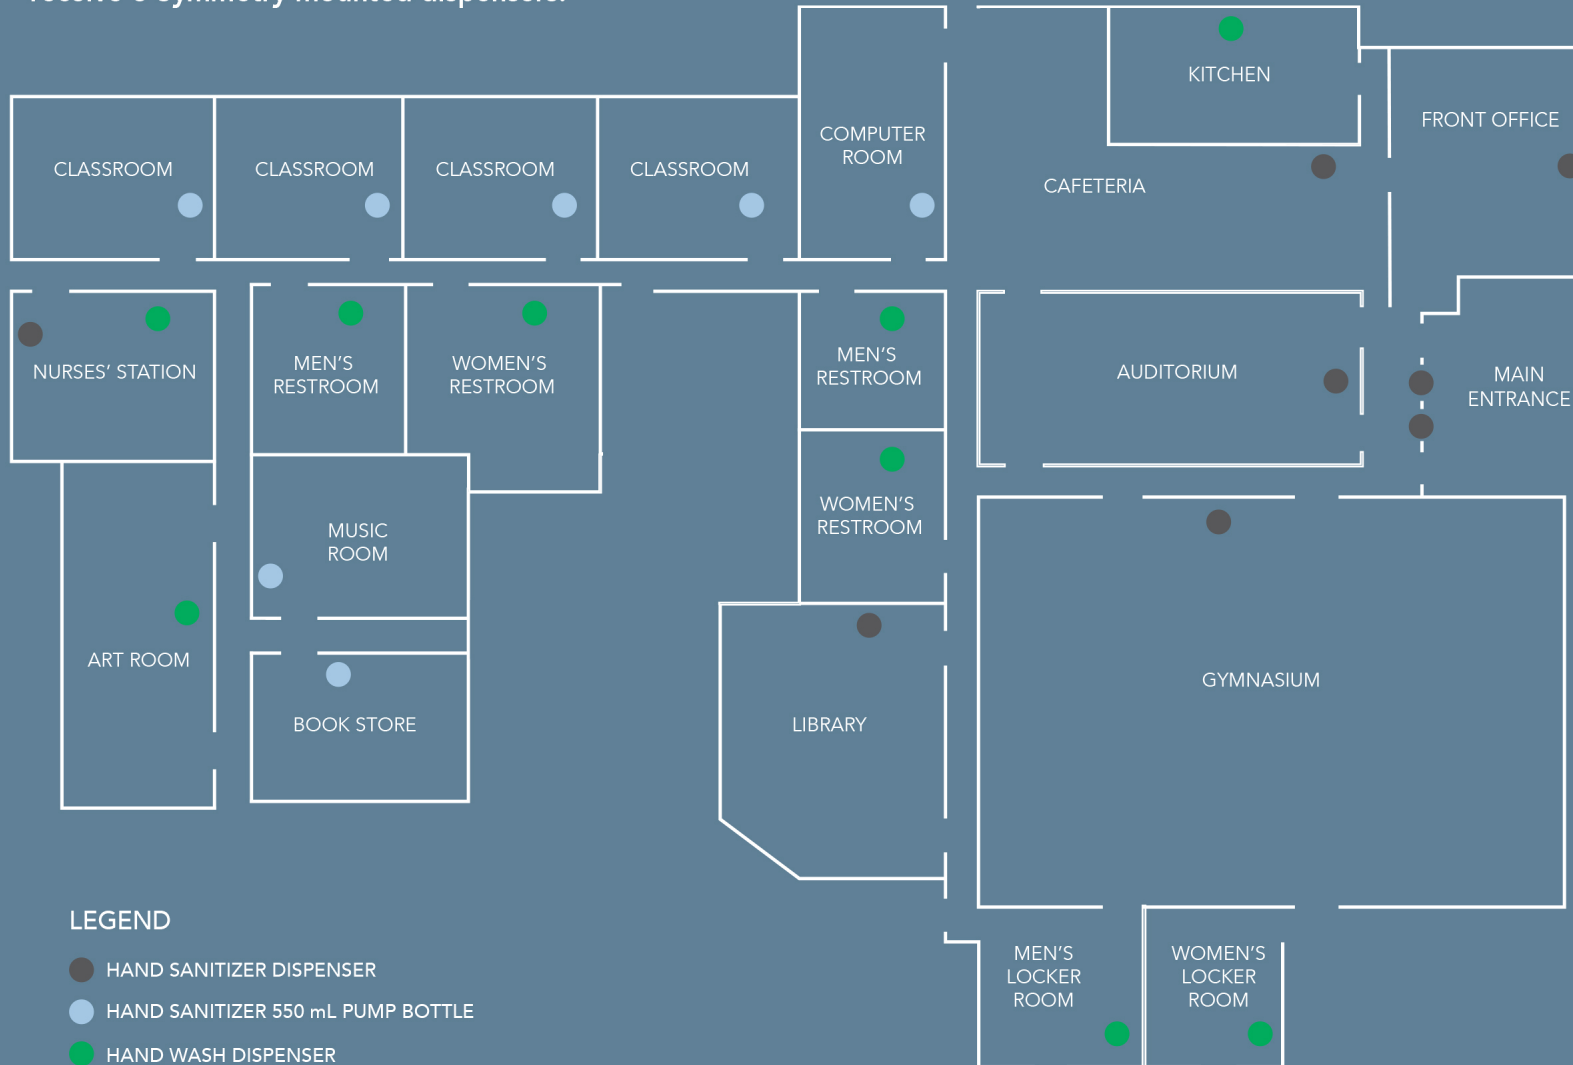

Wash your hands often

- [Wash your hands](#) often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, **use a hand sanitizer that contains at least 60% alcohol.** Cover all surfaces of your hands and rub them together until they feel dry.
- **Avoid touching your eyes, nose, and mouth** with unwashed hands.

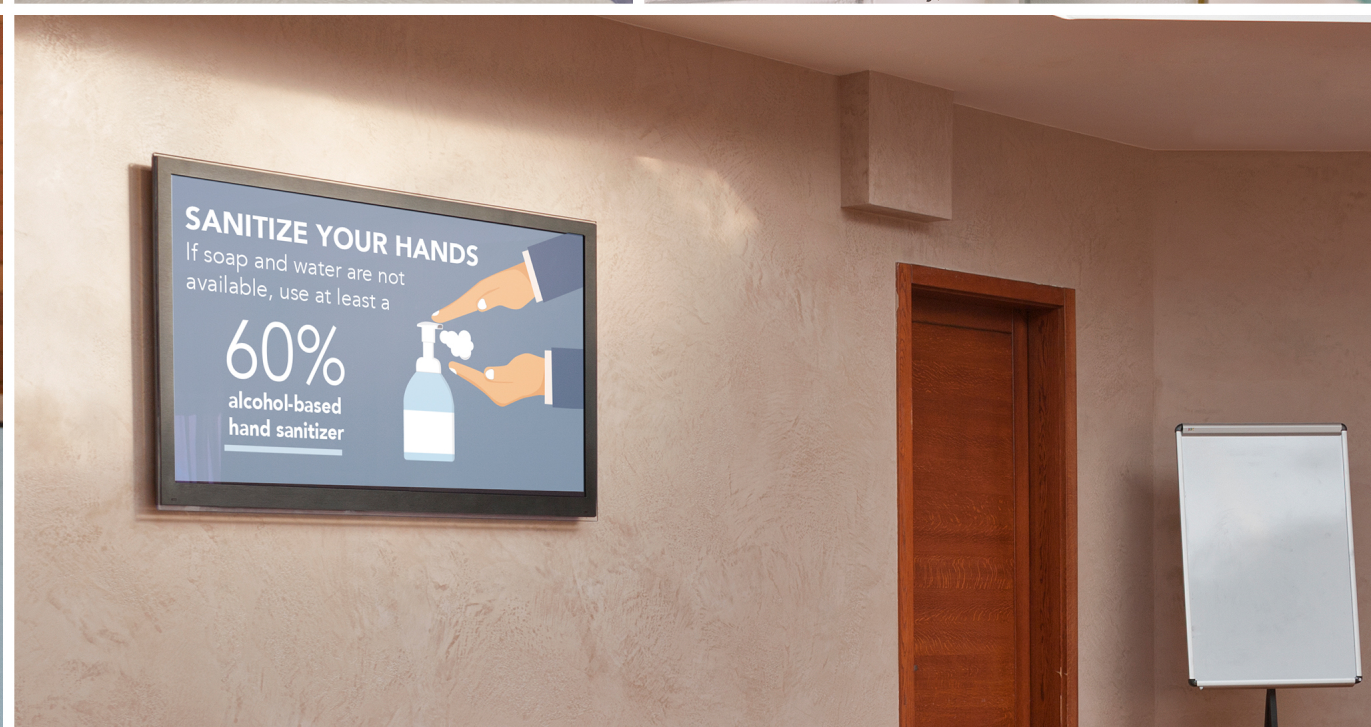

Hand Hygiene Product and Dispenser Plan

*With every purchase of 2 cases of Symmetry hand sanitizer product receive 3 Symmetry mounted dispensers.

Prepare Your School for Reopening During COVID-19

Let us help you prepare your school for reopening during COVID-19. Following CDC protocols, we provide the products and programs you need in place for student and staff well-being and safety.

Complete Hand Hygiene Program

Implement our Symmetry Hand Hygiene Program that includes products, dispensers, and customized tools to promote education, awareness, and motivation to practice proper hand hygiene.

Hand Hygiene Product and Dispenser Plan

*With every purchase of 2 cases of Symmetry hand sanitizer product receive 3 Symmetry mounted dispensers.

Symmetry hand hygiene products, mounted dispensers, and customizable tools that cater to your school's needs.

550 mL Pump Bottles

Enhanced Cleaning and Disinfecting Program

Frequently clean and disinfect high touch objects, surfaces and areas using our **EPA recognized emerging pathogen disinfectants** approved for use during COVID-19. Our Eco® Proportioning Program is fully integrated with effective, hermetically sealed products, including EPA emerging pathogen disinfectants, for any application.

Microban Antimicrobial Product Floor Protection

Provide an added level of 24/7 proactive protection against damaging microbes with Clarion® 25 Microban Antimicrobial Floor Finish and Arena® 300 Microban Antimicrobial Wood Floor Coating.

Honors Training Program

Receive in-depth training, presenting the proper products and procedures to meet your school's highest cleaning standards complete with online training videos, step-by-step manuals, tests, presentations, product literature, and customized training wall charts.

BUCKEYE HONORS PROGRAM

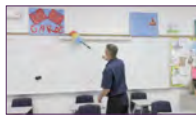

Routine Cleaning

5-Step Standardized Cleaning Process

1. High Dust

Clean in a clockwise pattern around the room from high to low.

2. Spot Clean/Remove Graffiti

Spot clean all nonporous surfaces with a Buckeye All-Purpose Cleaner. Clean glass, acrylic plastic and white dry-erase boards with a Buckeye Glass Cleaner. Spray tough soils with a Buckeye Muscle Cleaner. Let it dwell 2-3 minutes. For stubborn stains, agitate the area and then wipe it clean with a paper towel.

3. Dust Mop or Sweep

Scrape up items stuck to the floor with a putty knife, being careful not to gouge the floor.

4. Empty Trash

Do not push down on trash as there may be sharp objects in the trash bag.

5. Damp Mop

Post "Wet Floor" signs at the area entrance. Outline the area with a damp mop and fill in using a figure-8 technique.

Equipment Care

Clean and store equipment after completing Routine Cleaning procedures:

- Rinse mop heads and hang them to dry.
- Rinse buckets and wringers.
- Place dirty dust mop heads in a laundry bag.
- Treat new mop heads with a Buckeye Dust Mop Treatment.
- Wipe down all equipment including electrical cords.
- Check electrical cords for frayed or cracked wires or missing ground pins. Report any problems to your supervisor and do not use the equipment.
- If using an auto-scrubber, empty the recovery tank, clean the squeegee blade, and inspect it for damage. Report any damaged or worn equipment to your supervisor.
- Refill or change out products when necessary, or inform your supervisor.

Social Distancing Signage

Apply clearly marked customized social distancing signage at entrances, on floors, on walls, in hallways, in classrooms, in cafeterias, and more.

Social Media Support

Share with parents and the community the comprehensive measures your school is implementing to prepare for reopening during COVID-19 via social media. **We can work with you to develop customized graphics for posting.**

Screen Motion Graphics

Feature customized motion graphics and important COVID-19 related information and protocols on school screens and monitors in hallways, classrooms, cafeterias, and other common areas.

During these uncertain times, you can be certain we are committed to providing the products and customized programs your school needs to meet the highest cleanliness and preparedness standards.

Novel Coronavirus (COVID-19)—Fighting Products¹

UPDATED 6/19/2020

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the current novel coronavirus (COVID-19) outbreak. **This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use during the COVID-19 situation.** In particular, this list does not include products that appear solely on EPA's List G and L, although the EPA has now included these products to List N. For additional reference, please see <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

The information in this document is being provided as a public service. All efforts have been made to ensure the information is accurate, but ACC and CBC make no representations or warranties as to the completeness or accuracy of the information. ACC, CBC, and the product manufacturers listed in this document reserve the right to change, delete, or otherwise modify the information without any prior notice. Persons receiving this information must make their own determination as to a product's suitability prior to use based on the product labeling. ACC and CBC do not guarantee or warrant the standard of any product referenced or imply approval of the product to the exclusion of others that may be available. All products listed are registered for labeled uses in accordance with federal laws and regulations as of the date this document is being made available. State regulations may vary. In no event will ACC or CBC be responsible for damages of any nature whatsoever resulting from the use of or reliance upon products to which the information refers.

For more information about the COVID-19 Product list, please check out the following [COVID-19 FAQ](#) and the [Center for Biocide Chemistries FAQ](#). Additional information about how good chemistry is helping in the fight against COVID-19 can also be found at [Good Chemistry Lives Here](#).

Note: The CBC cannot make a determination of the effectiveness of a product in fighting pathogens like COVID-19. For questions related to the effectiveness of any product not listed below, please contact the manufacturer directly.

For use of the product, please contact the company/distributor to confirm use directions, or consult the EPA approved label at <https://www.epa.gov/pesticide-labels/pesticide-product-label-system-ppls-more-information>.

Tier II - Products that Disinfect Against Human Coronavirus

As of March 13, EPA is supporting the use of products that have demonstrated efficacy against another human coronavirus similar to SARS-CoV-2 on its List N, Disinfectants for Use Against SARS-CoV-2. In other words, the product has not proven that it can kill harder to kill viruses than SARS-CoV-2, which would be a Tier I product, but it can kill viruses like SARS-CoV-2. CBC therefore has amended its list to include a Tier II listing of products that state that they can disinfect human coronavirus.

EPA recommendation is that only if a product with an emerging viral pathogen claim is not available, use a product that will disinfect against human coronavirus.

Tier II - Products that Disinfect Against Human Coronavirus			
Commercially Available Product Name	Company/Distributor	EPA REG No.	Formulation Type

As a public service, CBC is maintaining this list of antimicrobials that have proven to be effective against stronger pathogens, such as norovirus or ebola. By publishing and maintaining this open list, CBC relieves federal, state, and local health officials' resources in order to focus on other aspects of the important effort to limit spread of this new disease. Listing is voluntary and compliance with EPA's "emerging viral pathogen" guidance for antimicrobial products is verified by CBC. CBC will be working with federal and state officials to disseminate the list and make it accessible to all those who need to be in the know.

ⁱ To include a product on CBC's list of Coronavirus-Fighting Products, registrants of the products should please contact Ms. Komal K. Jain at

Symmetry maintains **superior manufacturing standards** amid the influx of hand sanitizers hitting the market during COVID-19.

As a result of COVID-19, many additional manufacturers have registered with the FDA to produce hand sanitizers. However, the FDA is addressing potential safety concerns related to products that are not in line with its policy standards and others being marketed with unproven COVID-19 related claims. **The FDA cautions consumers to be vigilant of products sold with misleading, unproven claims.**

The FDA has released a temporary guidance policy for these additional hand hygiene manufacturers, including breweries and distilleries, to be manufactured without the FDA's oversight as long as the ethanol is derived from distillation or fermentation processes typically used for consumable goods, and no other additives or other chemicals have been added to it.

Additionally, many of these "start up" products lack emollients that protect the skin from the harshness of repeated use of alcohol. Lack of these additives will likely greatly increase the incidents of contact dermatitis, etc. over a short period of time.

Since its founding, Symmetry products have lead the way with formulas that are gentle on the skin, even with repeated use. This is demonstrated consistently with side by side trials in the highest use environments.

Symmetry is committed to supplying **superior hand sanitizers manufactured in an FDA registered and ISO certified facility.** Our products contain only FDA compliant ethanol and perform to the highest standards.
